BARRON & BROTHERS INTERNATIONAL

"Spreaders that work as hard as you do"

Pull-Type

Litter - Lime - Shavings Spreaders

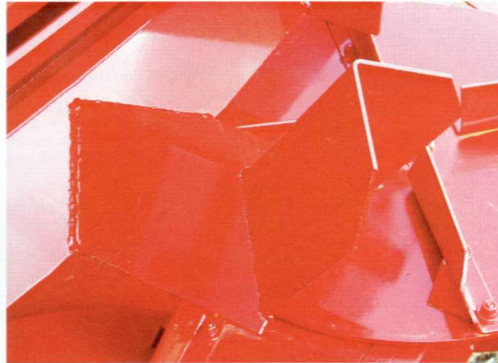

Advanced spreader technology delivering ***maximum coverage at a reasonable cost.***

The proven standard ... for pull type spreaders, BBI spreaders are the most productive, accurate and reliable spreaders available today. A BBI tradition for more than a decade, BBI precision spreaders are engineered using heavy-duty quality materials and are manufactured to standards above and beyond any other manufacturer.

Without a doubt, BBI spreaders are built using only heavy duty, high-strength materials for long lasting durability. Our frames are manufactured from 6" or optional heavy-duty 8" structural channel steel with reinforcement to strengthen the tongue area. Hopper beds are constructed from 10 gauge sheet steel. Choose between our time-tested, reliable mechanical drive or our optional advanced, self-contained hydraulic system engineered for less maintenance and the ability to vary spinner and bed chain speeds. Our "Accu-flow" pattern divider, an exclusive design feature on BBI litter spreaders, assures uniform material delivery to the spinners, for improved material distribution. Call your BBI representative for information about other features, options and specifications.

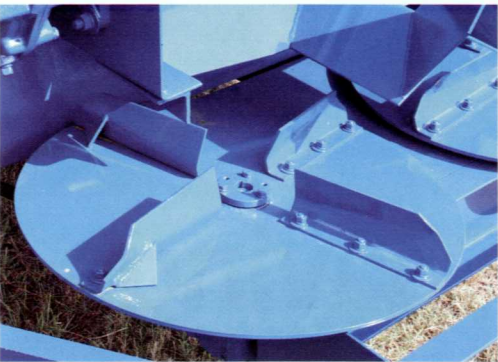

**Optional Self-Contained Or
Plug to Tractor Hydraulics**

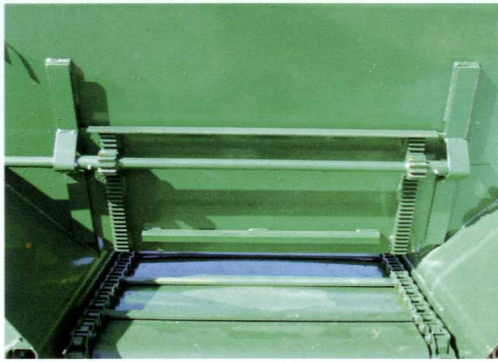

**"Accu-Flow" Patern Divider
For Accurate Material Flow**

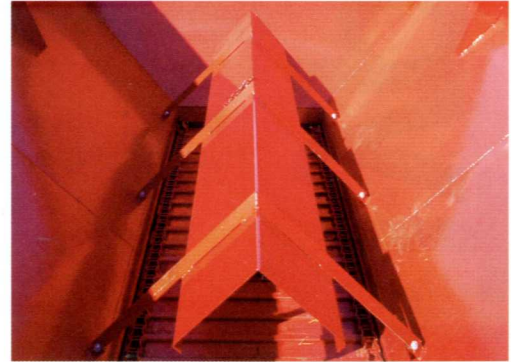

**Heavy-Duty Hopper Construction
With Heavy-Duty Chains.**
